Subject: Workshop with Industry involved with Cd and compounds (Cd, Cd(OH)₂, CdCO₃ or CdO) - Brussels 22 June 2018

Dear all,

Following-up on our workshop of last year (4/05/2017) we would like to propose a second workshop this year on June 22 in Brussels, Eurometaux Conference Center.

The publication of the draft of the 9th priority list is for the coming weeks and cadmium carbonate, hydroxide, cadmium and cadmium oxide are in eligible position in the scoring list and might be grouped and selected by ECHA, at this stage, for recommendation for inclusion in the Annex XIV list (Authorisation procedure). Other CMR Cd-compounds could be involved by grouping as well.

If this happens, efforts will be needed by several actors for (1) reacting to the upcoming public consultations over the summer and (2) preparing the submissions of applications for Authorisation in a very limited period of time (one application per use).

As last year, we tried to contact Cd-Consortium members and as many downstream users as possible.

Do not hesitate to enlarge this invitation to potentially interested parties, but please, give us feedback of such invitations.

Thanks to communicate your interest to attend the meeting.

Kind regards

IZA Reach team
